EDUCATION

Dartmouth College, Hanover, NH

June 2028

B.A. in Computer Science · Minor in Human-Centered Design

GPA 3.71/4.0

Relevant Coursework: Design Thinking, Software Design and Implementation, Full-Stack Web Development, Security Engineering.

Honors: Faculty Citation for Meritorious Performance, Full-Stack Web Development · QuestBridge Scholar

EXPERIENCE

Product Manager, Evergreen.AI

March 2026-Present

Dartmouth Center for Technology and Behavioral Health · DALI Lab, Hanover, NH

- Promoted from Project Assistant to Product Manager; now **lead both the design and development teams** on an AI wellness app backed by \$5M in Dartmouth research grants, taking it into testing with a 200-student research group.
- Pioneering tool calling for Evie, the app's LLM assistant, and designing the memory architecture that governs what Evie retains across student interactions.
- Auditing friction points across the app, starting with an onboarding flow identified as a source of student drop-off.

Product Commercialization Intern

May 2026-August 2026

EchoStar Corporation, Littleton, CO

- Built and handed off a Snowflake-backed Streamlit dashboard for product leadership, consolidating performance metrics across **~13 first-half 2026 product launches** from hundreds of thousands to millions of rows.
- Ran stakeholder interviews and usability sessions to scope requirements and documented specs other teams could build against; revised an early version to expose more underlying figures after leadership found it over-summarized.
- Selected Streamlit over Looker Studio and Tableau after weighing security, licensing, and integration tradeoffs; validated outputs against expected results and existing internal dashboards before handoff.
- Drafted SQL and Python with CoCo, CoWork, and Gemini, and built a custom Gemini Gem to synthesize stakeholder feedback into prioritized action items, reviewing every AI output before it shipped.

Product Director

February 2026-July 2026

Youphoria, Remote

- Promoted from Project Intern to Product Director within a month at a live social wellness app startup, owning prioritization and delivery of new product initiatives.
- Owned the **Groups feature end-to-end** (vetting, sequencing, build oversight, testing), winning buy-in on social differentiation and retention through accountability; shipped to the live app and tracked cohort retention.

Project Manager

September 2025-March 2026

Design Corps, Hanover, NH

- Co-led research for Dartmouth's Residential Communities Working Group: ran 23 stakeholder interviews and a focus group across 41 student voices; findings were **cited by name in a President's Office report** shaping a ~\$500M capital initiative.

PROJECTS

Personal Dashboard — Personal Project

2026-Present

github.com/Alex-Cruz-Valencia/Personal_Dashboard

- Building a full-stack dashboard (Next.js, TypeScript, Node.js) end-to-end with **AI coding tools** (Claude Code, Cursor, Codex) to build hands-on AI product and engineering fluency.
- Shipped Gmail, Google Calendar, and Todoist integrations to view and edit tasks, events, and email in one place, across five independently scoped phases and 24+ commits.

LEADERSHIP & CAMPUS INVOLVEMENT

Officer, Dartmouth Society of Computer Science Students

Current

- Oversee all club projects and help organize **professor dinner & talk events**, a student hackathon, and social events for Dartmouth's CS community.

Product Manager Mentor & Instructor, DALI Lab

September 2026-Present

- **Teach DALI Lab classes** and mentor two student PMs leading partner projects (an AI learning platform and BRIC Games) on scoping, prioritization, and partner communication.

Member: SHPE, ALPFA, ColorStack · Dartmouth Tech Consulting Group (former UX/UI Designer)

SKILLS & INTERESTS

AI Tools: Gemini (incl. custom Gems), Claude Code, Cursor, CoCo, CoWork, LLM tool calling and memory design

Technical: SQL, Python, Snowflake, Streamlit, JavaScript/TypeScript, Next.js, HTML/CSS, Figma

Languages & Interests: English and Spanish | Boxing, poker, custom mechanical keyboards
